

Finally . . .

A Cell Tower Bird Deterrent That Works!

Proven effective in eliminating over-night vulture and other roosting bird problems and the mess and danger that result. Pure Tower also discourages Osprey and Eagle nesting! A solution that clears your tower, and keeps it that way. Does not exchange one problem for another. Pure Tower is a smart system that actually self modifies itself EVERY DAY based on a number of business rules and criteria. No two days are ever alike. This way the birds will not become accustomed to it.
